

Instruction Manual

for

SMART CALCULATOR

Hello There, we heartly thankful to you for using our calculator. We heartly welcome you to our ecosystem. We are here to help you.

- 1) At first, when you open the calculator, by default the calculator is set to be “**OFF**”, so to use the calculator click “**ON**” button in the calculator as shown below.

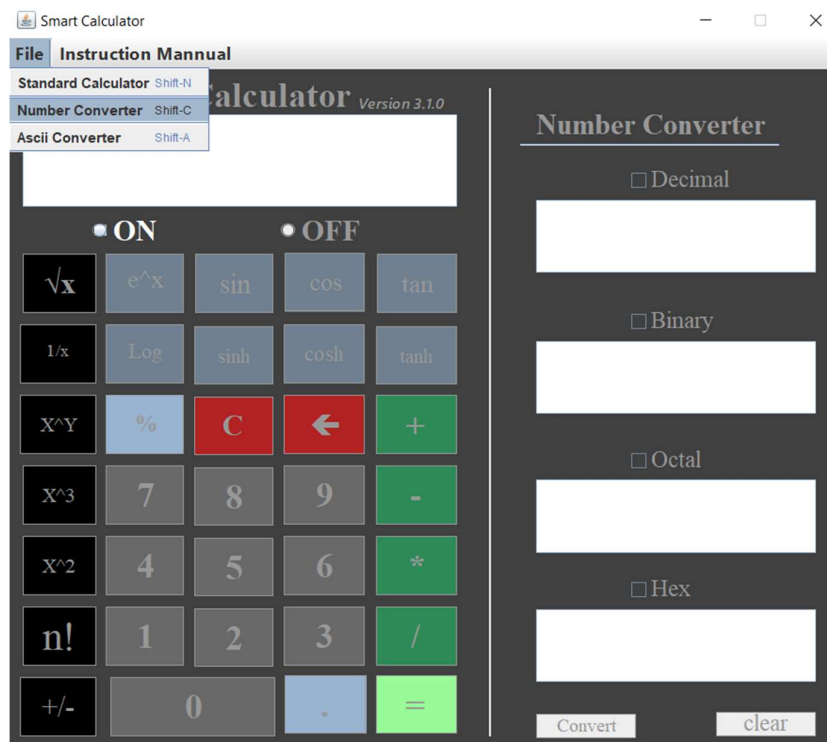

- 2) Now, Calculator is ready to use for all basic needs.

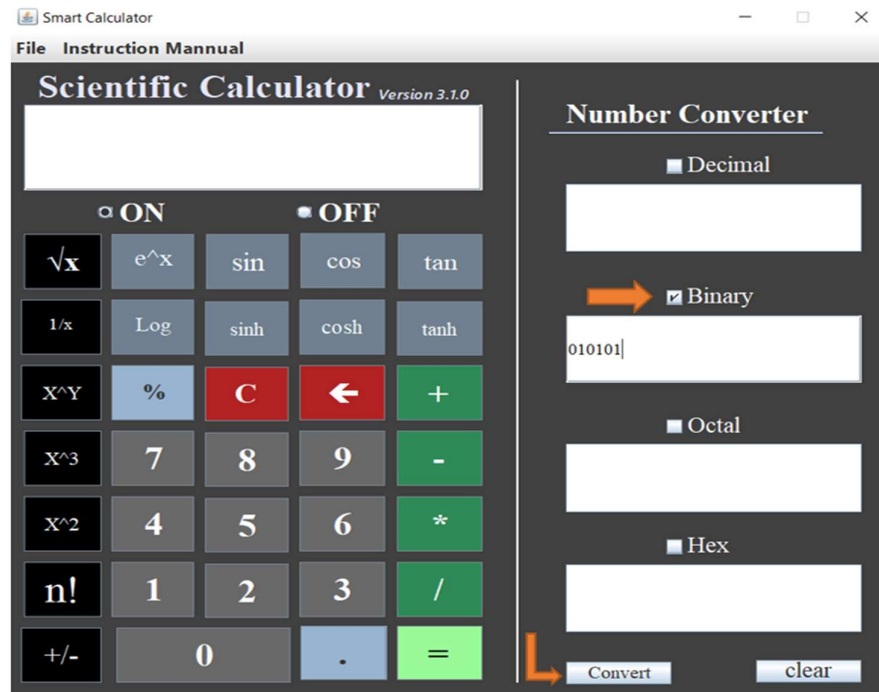

- 3) If You want more actions, then go to File in menu bar and click on it. You will get a sub menu options like below.

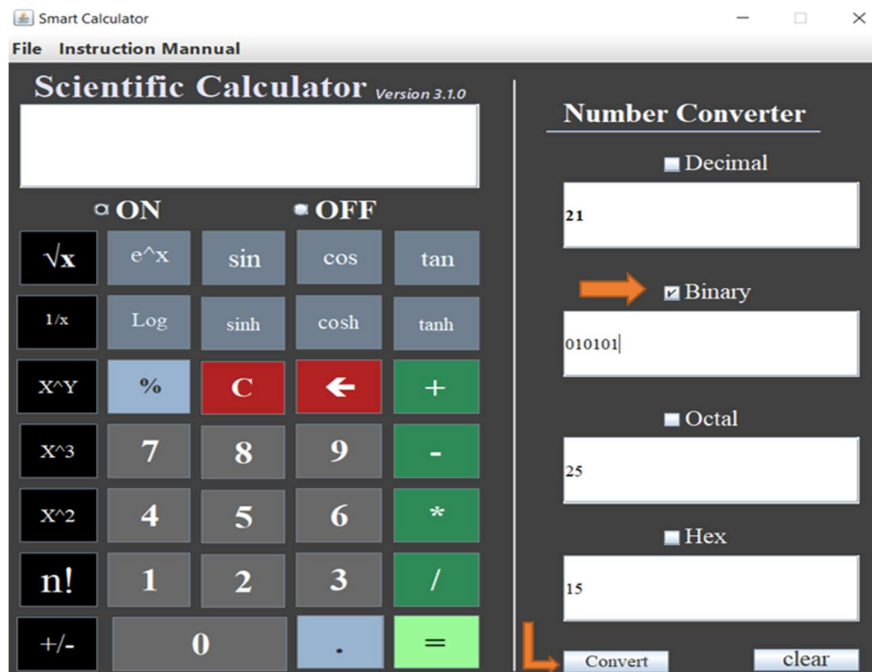

- 4) The current view is Standard Calculator.
- 5) To Get the **Number Converter**, click the number converter option or click *Shift + C* in your Key Board. Both the ways will work. Now calculator looks like this.

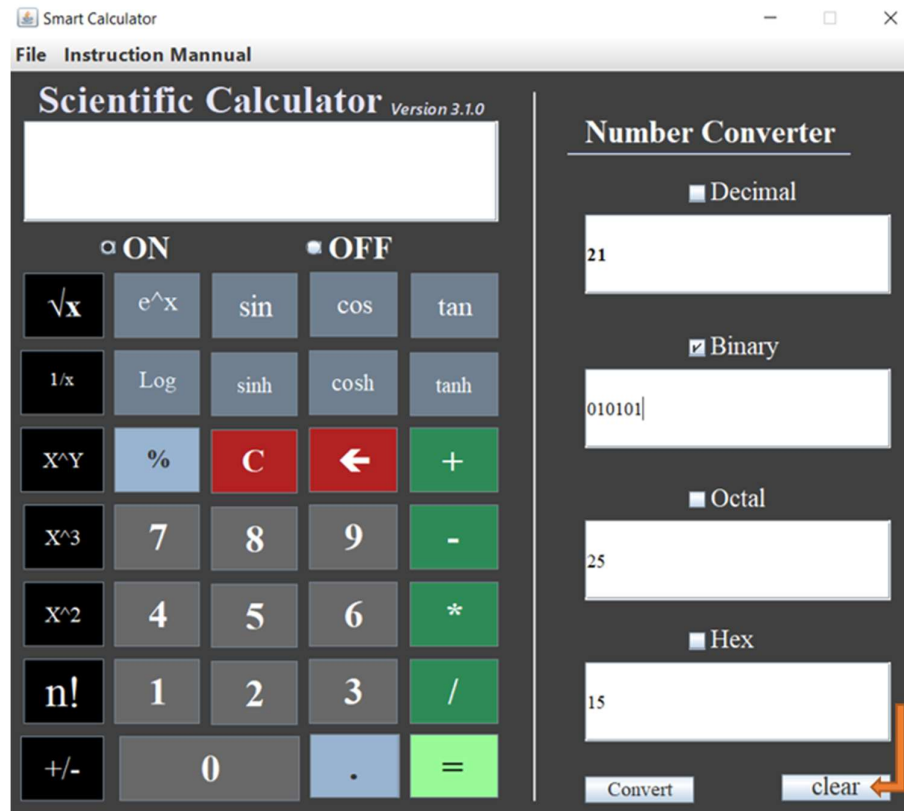

- 6) This number converter will convert All – to – All Number systems. To do this Just check any one number system and enter input in that respective text box. Please remember that you are entering in the correct text field, because after selection of a single number system, remaining number systems will not accept their input. Only the selected one will be accepting the input.
- 7) After entering the input, just click on **Convert** button. It will convert that number to all remaining number systems.

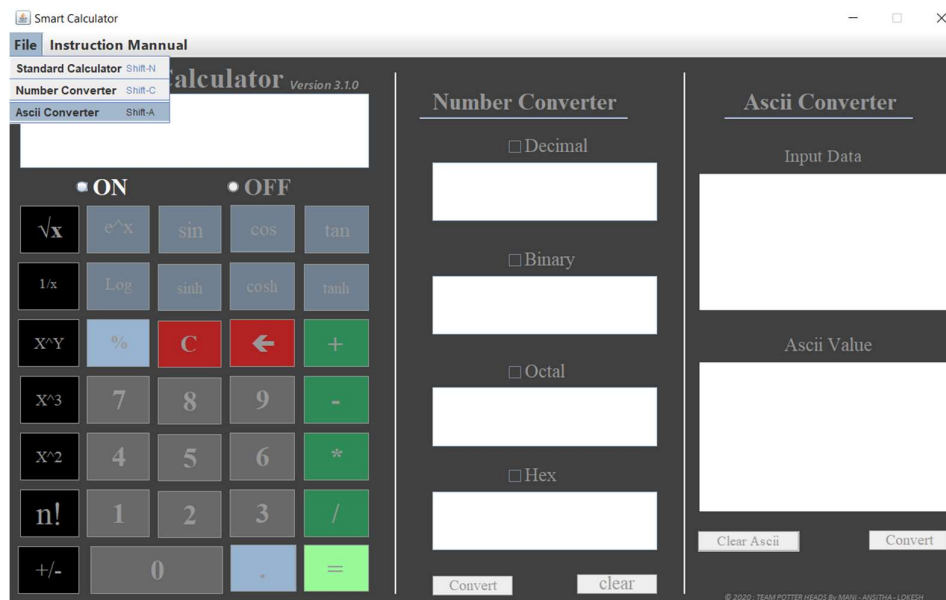

After Conversion, calcii will look like this,

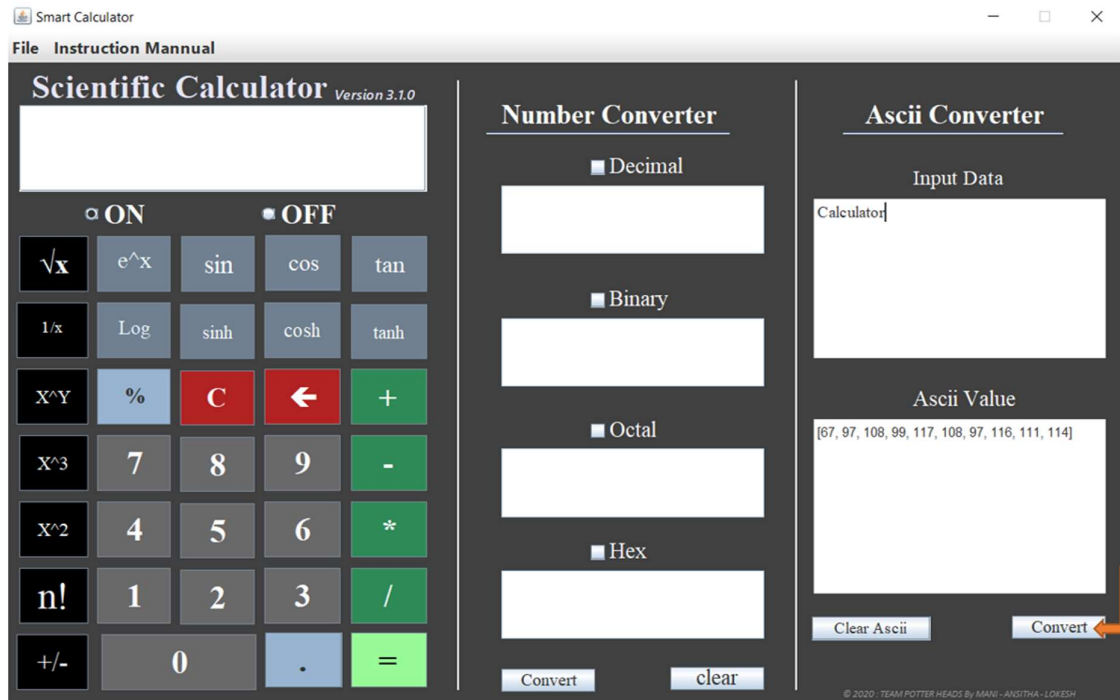

- 8) To calculate again with different values, just click **clear** button which is next to convert button.

- 9) Now, let's go to new feature called "**Ascii Converter**" For this you can directly press **Shift + C** in your key board or you can to file then click on Ascii Converter. This will open for you.

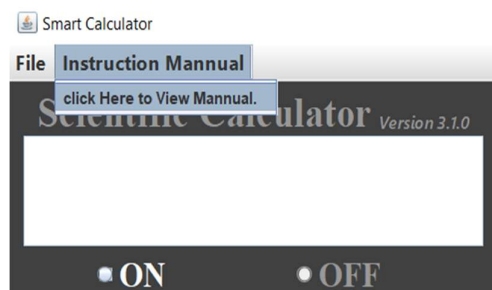

- 10) Now here no restrictions, just give input at Input data, click on convert. But remember that Ascii Value text Field is to display the output only it won't accept any input.

After clicking the convert Button all characters in the input will be converted into an array of their respective Ascii Values.

- 11) To Get Any Help go to “**Instruction Manual**” and there click on the option called “**Click Here to view Manual**” that will automatically find your system’s default browser or app to view the pdf’s and shows this Manual.

THANKS FOR BEING WITH US.
